Flexible, Powerful Document Capture Software Solution

Serious document capture requires serious software. Visioneer® Capture SE is the batch scanning solution modern organizations turn to for powerful document capture and intelligent archiving. From basic editing, batch splitting and merging, to workflow-specific capabilities like document indexing, barcode reading and data extraction, Visioneer® Capture SE is perfect for individual users, yet powerful enough for entire fleet deployments.

Take the frustration out of document search and create fully text-searchable PDFs using Visioneer® Capture SE's powerful OCR engine. And save even more time with patch and barcode technology that can automatically separate batches into different files during scanning.

Visioneer® Capture SE software is included with all new Visioneer® and Xerox® workgroup/departmental and production scanners. Need help getting started? Contact our document capture experts at www.visioneer.com/contact.

Visioneer® Capture SE Software

Scanning Flexibility
Directly set and adjust the scan profile without opening up a complex driver screen. A Scan Settings window offers more detailed options, including Visioneer's TWAIN interface.

Built-in Image Processing
Visioneer Acuity image processing is built into Visioneer® Capture SE, ensuring high quality scans. Acuity includes more than 25 features such as dynamic threshold and advanced color dropout.

Batch Management
Each scan job is saved as a batch, automatically named and listed in Visioneer® Capture SE's Batch Explorer. You can create new batches, delete batches, and merge or split batches.

Job Separation
Scan jobs can be separated automatically into different batches, using patch code detection, barcode detection (20 supported formats) or a fixed number of pages.

Easy Editing
Visioneer® Capture SE's Batch Preview lets you edit and finalize the scan job. Pages can be rearranged, edited, deleted and re-scanned. Simple controls make cleanup and adjustments easy.
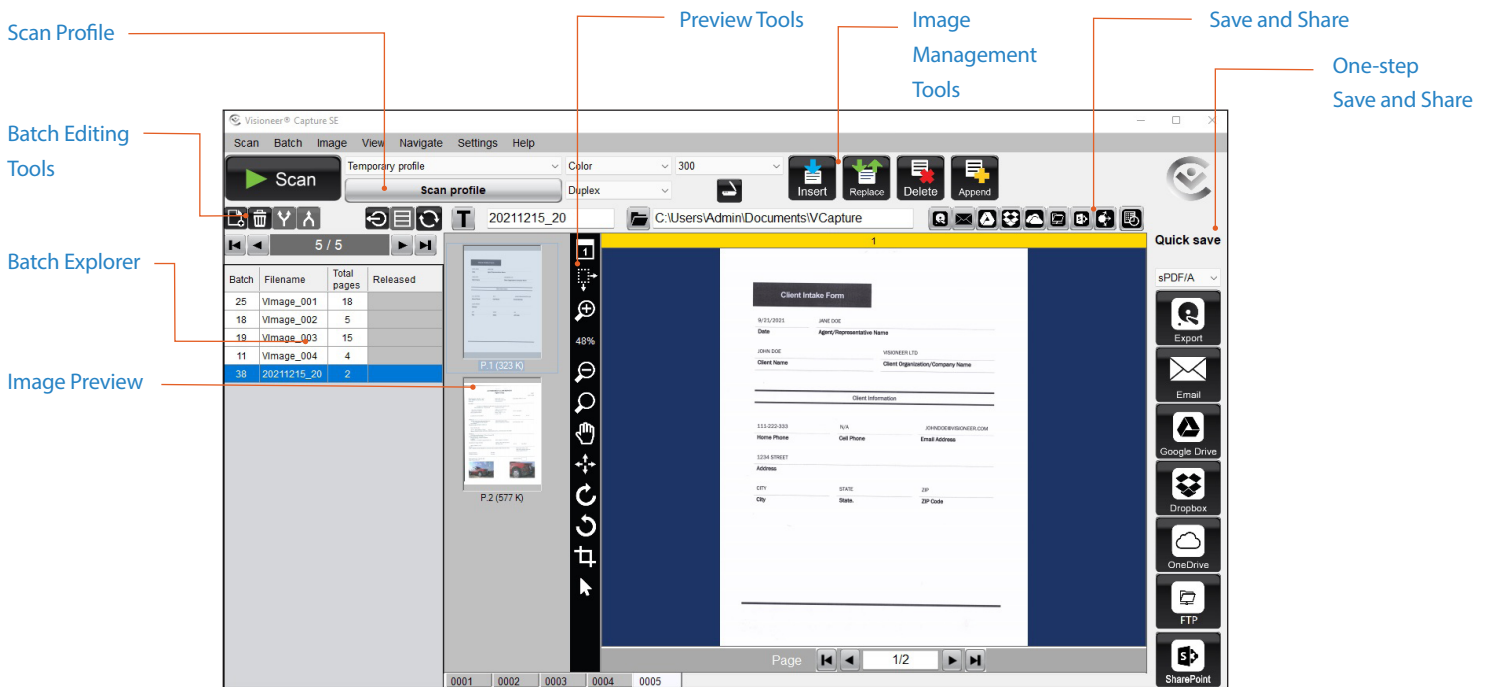

Powerful Indexing
Index Mode uses intelligent technology and gives Visioneer® Capture SE its power. Zonal OCR or barcode data is used for data extraction and metadata index file creation.

Backup and Restore
Backup and restore allows all your settings to not only be saved, but also transferable and easily deployed for setup across multiple PCs.

Save to Cloud, Network or PC
Save and Share releases each batch to a choice of file formats – PDF (A & MRC), Searchable PDF (A & MRC), JPG, BMP or TIFF are supported - to PC, network destinations, FTP/SFTP, Email, SharePoint and cloud services.

Recent Updates

- Cut/copy/paste between batches
- Merge multiple batches
- Multi-destination export
- Auto-generate file naming
- Export as sPDF/A export type
- Export to FTP, SFTP, SharePoint, Oracle DB, cloud and more
- Multi-factor authentication for SharePoint

System Requirements

- Intel i3 or equivalent processor (Intel i7 or equivalent recommended for production scanners)
- Microsoft® Windows® 7, 8, 10, 11
- 4GB internal memory
- 1.5GB min available hard drive space
- Minimum 24- or 32-bit monitor
- 1280 x 1024 resolution

Visioneer Intelligent Software Platform

OneTouch
An easy-to-use scanner workflow application that performs all steps in a complex scanning operation at the touch of a button.

Acuity
Enables you to improve the visual clarity of scans. Acuity uses over 25 advanced algorithms to intelligently correct documents.

DriverPLUS
Provides an impressive array of settings to enable precise scan customization with a simple-to-use interface and helpful tool tips.

Organizer AI
Manages your files with fast search, conversion, file analysis and cleanup, tagging, PDF editor and automated file classification.
